IndiaTVDNA Turbo Cache Pro - Product Information

Turbo Cache Pro एक WordPress performance toolkit है जो caching, object cache, Cloudflare/CDN, image optimization, preload और diagnostics को एक unified dashboard में manage करने के लिए designed है।

किसके लिए है?

Blogs / Article Sites

Frequently read pages को cache और preload करके server work कम करने में मदद।

WooCommerce

Dynamic cart/checkout/account routes के लिए safety bypass और selective purge controls।

Elementor / Heavy Themes

Compatibility-aware optimization और risky changes को controlled तरीके से apply करने का approach।

Cloudflare Users

Verification, purge और edge-cache coordination के लिए integrated tools।

Core modules

Module	Purpose
Page / Early Cache	Repeat requests का server work कम करने के लिए cached output serve करना।
Auto Optimize	Site type detect करके recommended safe configuration apply/verify करना।
Object Cache	Redis/Memcached probes, selection और fallback behavior।
Cloudflare / CDN	Credentials verify, cache purge और configured CDN coordination।
Image Optimization	AVIF/WebP/original modes, conversion queue, quality/cleanup controls।
Preload	Cache warm-up/adaptive retry behavior।
DB Optimizer	Database maintenance tools; destructive cleanup को सावधानी से handle करना चाहिए।
Performance Doctor	Health/diagnostic signals और detected compatibility issues।

License plans

Plan	Validity	Production sites
30 Days / 1 Site	30 days	1
1 Year / 1 Site	365 days	1
Lifetime / 1 Site	No expiry	1

Core plugin same रहता है; plan license validity तय करता है। Protected CUSTOMER_READY package IndiaTVDNA Easy Secure licensing के साथ deliver किया जा सकता है।

System requirements

- WordPress 6.0+ recommended
- PHP 8.1+ recommended
- HTTPS strongly recommended
- Enough disk space for cache/image variants
- Writable WordPress cache directories
- Redis/Memcached optional; server पर service उपलब्ध होनी चाहिए
- Cloudflare optional; customer का अपना account/token required

No speed guarantee: Cache plugin performance hosting CPU/RAM, PHP setup, theme, plugins, database, traffic, CDN और third-party scripts पर depend करती है। Product का उद्देश्य safe optimization tools देना है, fixed PageSpeed score guarantee करना नहीं।
